Summary

Computer Engineering undergraduate specializing in Artificial Intelligence and Machine Learning, with strong foundations in machine learning algorithms and data analysis. Experienced in building predictive models and end-to-end ML solutions through academic and personal projects. Passionate about solving real-world problems using data-driven approaches and writing clean, maintainable code.

Education

Bachelor of Engineering in Computer Engineering (AI & ML) **2023 – 2027 (Expected)**
JSS Academy of Technical Education, Bengaluru, Karnataka, India
CGPA: **8.97 / 10**

Pre-University Course (Science – PCMB) **2021 – 2023**
Surana PU College, Bengaluru, Karnataka, India
Percentage: **87%**

Projects

SentinelAI — Local AI Security & Monitoring System *Python, FastAPI, React, SQLite, Ollama, SQLAlchemy*
GitHub Repository

- Built a privacy-first AI system using FastAPI, React, SQLite and Ollama that continuously monitors CPU, RAM, disk and processes while learning user-specific behavioural baselines.
- Designed a modular Behaviour Engine with multiple analyzers for resource usage, process behaviour, startup changes and long-term system drift to detect adaptive anomalies.
- Developed an intent-aware RAG pipeline with asynchronous health logging, WebSockets and automated PDF reporting, enabling natural language system queries grounded in local telemetry.

Potato Disease Detection Using CNN *Python, TensorFlow, CNN, OpenCV, React*
GitHub Repository

- Built a CNN model to classify potato leaf diseases (Early Blight, Late Blight, Healthy) from images with high accuracy.
- Integrated OpenCV for real-time disease detection through live camera feed, enabling practical field usage.
- Improved accuracy using preprocessing and augmentation.

Quiz Battle – Real-Time Multiplayer Quiz Game *Spring Boot, React, MySQL, WebSocket*
GitHub Repository

- Built a full-stack real-time multiplayer quiz platform using Spring Boot REST APIs and WebSocket (STOMP) for live game state synchronization.
- Designed MySQL schema with entities for Quiz, Question, GameSession, and Answer; managed data access via Spring Data JPA.
- Implemented real-time score updates and countdown timers.

Technical Skills

Programming Languages: Python, Java, C

Frameworks & Libraries: FastAPI, Spring Boot, React, TensorFlow, Scikit-learn

Databases: MySQL, SQLite

Developer Tools: Git, GitHub, Postman, VS Code, Power BI, Tableau, Excel

Concepts: Machine Learning, CNNs, Retrieval-Augmented Generation (RAG), REST APIs, WebSockets, SQLAlchemy, Object-Oriented Programming (OOP)
